Navigating the Landscape of Digital Dentistry

A Practical Guide to Implementing Digital Workflow in Your Practice

Dr. Bart Silverman & Mark Ferguson

Digital implant dentistry is transforming traditional clinical methods and analog approaches into a more efficient and streamlined course of treatment for both surgical and restorative dentists. This technology can improve communication within the treatment team consisting of the surgeon, restorative doctor and lab to achieve the most predictable clinical outcomes while reducing both patient visits and chair time, resulting in increased profitability. This one day hands-on clinical training session will provide detailed guidelines for applying best practices in digital implant dentistry and proven marketing strategies for implant practice growth.

Coursework will include the following areas:

- Demonstration of the features and benefits of intraoral scanning devices
- Merging of intraoral scans and CBCT radiography to achieve more predictable results through:
  - Use of surgical guides for implant placement
  - Fabrication of temporary abutments and customizable gingival formers
  - Fabrication of temporary crowns for sculpting of gingival tissues on day-one for a superior outcome
- The advantages of scanning implants at the time of integration, through the use of scanning bodies, in the fabrication of custom abutments and crown fabrication
- Positioning the restorative dentist for greater success by utilizing a digital workflow that reduces restorative appointments, eliminates impression material cost, and increases implant profitability
- Implant marketing strategies for growing a restorative referral base through a streamlined digital workflow
- Hands on scanning exercises to demonstrate use of digital technology throughout your daily practice
- Hands on exercise utilizing surgical guides and kits to place implants in models
- Understand the complete digital workflow process and how to communicate between the surgeon, restorative dentist and laboratory

Bart W. Silverman, DMD

Dr. Bart Silverman graduated from Fairleigh Dickinson University in 1982 Summa Cum Laude and received his doctorate in Dental Medicine in 1986 from Fairleigh Dickinson Jr. School of Dentistry, where he was a member of the Omicron Kappa Upsilon Honor Society. He completed his Oral and Maxillofacial residency at Westchester County Medical Center in 1989 and was chief resident in his final year. He is in private practice limited to Oral and Maxillofacial Surgery in New City, N.Y. and is a Diplomate of the American Board of Oral and Maxillofacial Surgery and a Diplomate of the American Board of Oral Implantology. He has been lecturing in the field of implant dentistry for over 25 years. Dr. Silverman is an attending Physician at Westchester County Medical Center, Department of Oral and Maxillofacial Surgery, a Clinical Associate Professor at New York Medical College, faculty at Touro Dental School in N.Y. and faculty at NYU Post Grad Continuing Education Dental Implant Program.

Mark Ferguson

General Manager, Vulcan Custom Dental

Mark Ferguson graduated from the American Institute of Medical and Dental Technology. He began his career as an Advanced Cosmetic Technician at CMR Dental Lab, working directly with Matt Roberts. Mark also spent several years training with Lee Culp and the Las Vegas Institute (LVI). He has extensive experience working directly with doctors and labs on all aspects of case planning, preparation and presentation. He has also authored numerous hands-on and technical articles that are regularly featured in leading publications. Mark is a frequent lecturer, presenting digital lab solutions at meetings across North America.
