

# Advanced Implant Training for Dental Nurses

presented by Duncan Park

## COURSE DESCRIPTION

A nurse's course from the dentist's perspective! This course is designed to develop the skills of the nurse in an implant surgical setting. During the day the delegate will discover techniques to improve their role in the organisational side of treatment and the importance of their role during the overall patient journey to help reduce the stress for the dentist.

The topics covered throughout the day will include a refresher session on the aseptic technique; the different implant systems and biologics materials available on the market; open and closed impression taking techniques; hands-on training using impression copings and impression materials, with correct instrumentation.

## LEARNING OUTCOMES

Delegates will increase their knowledge and understanding of:

- Complex implant procedures and materials
- The different restorative stages taking into consideration the types of materials, techniques used and organisation of the surgery
- The patient journey and the importance of nurse support
- The organisation of appointments and charting patient treatment progress
- What makes a nurse a comprehensive implant nurse

## COURSE LEVEL

Ideal for those with experience in Implant Nursing.  
Intermediate / Advanced

## COURSE DATES

- Leeds - Saturday 27th February 2016
- London - Saturday 10th September 2016

## SPEAKER / TRAINER

### Duncan J. Park

BDS (Hons) MFDS RCS (Eng) MMedSci (Dental Implantology)

Duncan is currently an associate dentist having qualified from Sheffield University in 2003 with Honours. He continued his surgical training by holding SHO and staff grade positions in oral and maxillofacial surgery in Sheffield, Barnsley and Chesterfield. One of Duncan's main interests is Implant Dentistry, he has completed the Sheffield 1-2-1 Implant Course and his MSc in Dental Implantology. Duncan works in 4 private practices providing general, surgical and implant dentistry including referrals and also offers IV sedation for nervous patients and more complex procedures. Moving between each practice Duncan has the perspective of working with multiple nurses of varying experiences and will regularly support with training as required.
