

The Desire to go Digital

presented by Dr. Marcos White
17th March 2017
6 CPD credit hours

COURSE DESCRIPTION

This course is designed for the forward thinkers in implant dentistry and will take a practical step by step approach on how to achieve optimum restoration results using solely digital techniques. The course aims to provide delegates with the insight and understanding on how digital dentistry eliminates common errors in comparison to traditional techniques.

Delegates will learn how implementing digital dentistry within their practice can be of benefit to both their business and their patients. Taking into consideration the number of patient visits and the reduction in practice overheads, the process ensures the patient continues to receive the highest standard of care and will leave the practice with an accurate restoration. Discover how to live the future of implant dentistry everyday with experienced CEREC user Dr Marcos White.

LEARNING OBJECTIVES

- Increase their confidence in creating complex restorations with digital technology
- Understand the benefits of digital dentistry from a business and clinical perspective
- Learn how digital workflow can create dental and implant restorations for your patients.
- Be able to work to a checklist to implement each step into their own practice

Dr. Marcos White

Marcos White qualified from Leeds Dental Institute in 2000. He completed Paul Tipton's one-year restorative course in 2005 and one year implant course in 2012. Since then he has gained his Postgraduate Certificate in Implant Dentistry from the University of Warwick.

Today Marcos clinical practice focuses largely on implants, veneers and Invisalign. The Courtyard has its own on site digital lab and is able to create every aspect of dentistry it produces from a single veneer to a full arch implant bridge.

Marcos is one of the clinical mentors on the BAIRD implant course and regularly has delegates observing his surgeries. In addition he runs Study Clubs to local dentists on digital implant dentistry.

He looks forward to the opportunity to inspire international colleagues of the power of digital techniques in delivering cosmetic implant dentistry.
