

TeethXpress®

Immediate Loading with Live Surgical & Restorative Demonstrations

Presented by Dr. Paul Swanson & Mr. Jonathan Dean
2nd & 3rd March 2017 • 5th & 6th October 2017

COURSE DESCRIPTION

Recommended for both the dentist and the technician, this course helps both professions develop their knowledge and understanding of the full-arch, immediate-load protocol and the teamwork required to predictably provide this treatment modality.

During the 2 days, participants will focus on the 3 key elements needed for success: clinical, marketing and laboratory. The clinical portion of the course includes: live surgery, the TeethXpress method of immediate fixed conversion, best practices for teamwork between the dentist, restorative dentist and lab, as well as, implant placement and minimising chair time for optimal patient care. The marketing portion will cover how to market and increase case acceptance with patients; including the role of the auxiliary team throughout the patient journey. The laboratory portion of the course will describe the role of the laboratory technician in the TeethXpress protocol with special focus on the immediate denture.

NEW for 2017 –
Dedicated Immediate
Loading Training
Modules for Dental
Technicians!

LEARNING OUTCOMES

- Understand the importance of laboratory protocols and pre-op planning for the procedure
- Be able to select the correct materials, components and techniques dependent on the case
- Have an increased understanding of the level of technical support offered during the surgical procedure
- Understand the latest concepts on how to modify the prosthesis chairside

pre-operative

post-operative

Dr. Paul Swanson

BDS MFGDPUK DiplImpDentRCSEng
MSc (Implant)

Paul Swanson qualified from the University of Liverpool in 2000. He completed his MFGDP qualification in 2003 and a Post Graduate Certificate in Conscious sedation in 2004. In 2008, he received the Diploma in Implant Dentistry from the Royal College of Surgeons of England and the Advanced Certificate in Bone Grafting. In 2011, he received a Master of Science degree in Implant Dentistry from Queen Mary University of London. Over the last 7 years, the volume and complexity of cases has naturally increased. Paul's clinical practice is now limited to Implant Dentistry. He owns a specialist referral practice in Liverpool and contributes to the multidisciplinary cases done by his team. He mentors dentists at both entry level and advanced implantology and contributes to study clubs in his region. Paul is the co-director of IDEAL - an organisation running dental courses for all members of the dental team.

Mr. Jonathan Dean

Dip CDT RCS (Eng), LBIDST

Jonathan is owner and senior technician of C&J Dental Technologists, a small dental laboratory producing exclusively private implant, crown and bridge and prosthetic work. Qualifying as a dental technician in 2000, Jonathan went on to qualify as a Clinical Dental Technician in 2008. One of the first CDT's in the UK, Jonathan is an advisory board member of the British Association of Clinical Dental Technicians (BACDT). During the last 10 years, over 350 immediate load cases have been completed by C&J and as more patients are demanding same day results, TeethXpress cases will become a main part of Jonathan's work load.

SCHEDULE

Day 1

08.30 - 19.00

Day 2

08.30 - 17.00

VENUE

IDEAL Education Facilities

Rose Lane Dental Practice
94 Rose Lane, Liverpool
