

The Beauty of Digital Dentistry

presented by Dr. Marcos White

8th September 2017

6 CPD credit hours

COURSE DESCRIPTION

This course has been designed to provide delegates with the knowledge and skill on how to take complete ownership of the aesthetic outcome of their implants. The course will cover the digital and surgical management of anterior implant restorations. Delegates will learn how to build their own digital laboratory in 3 easy steps and through case discussion discover how to approach the more challenging soft tissue cases with creative treatment planning. Delegates will also discuss how to use innovative product solutions to achieve the desired result.

This course aims to encourage technical autonomy within the dental practice to create optimum aesthetic results and minimise additional business costs that are associated with non-digital procedures.

LEARNING OBJECTIVES

- Acquire new skills & understand the concepts associated with designing and creating complex restorations with digital dentistry techniques
- Understand the 6 key principles in cosmetic implant dentistry
- Increase their knowledge on the business fundamentals of digital implant dentistry
- Learn how to be autonomous in the creation and design of implant restorations

Dr. Marcos White

Marcos White qualified from Leeds Dental Institute in 2000. He completed Paul Tipton's one-year restorative course in 2005 and one year implant course in 2012. Since then he has gained his Postgraduate Certificate in Implant Dentistry from the University of Warwick.

Today Marcos clinical practice focuses largely on implants, veneers and Invisalign. The Courtyard has its own on site digital lab and is able to create every aspect of dentistry it produces from a single veneer to a full arch implant bridge.

Marcos is one of the clinical mentors on the BAIRD implant course and regularly has delegates observing his surgeries. In addition he runs Study Clubs to local dentists on digital implant dentistry.

He looks forward to the opportunity to inspire international colleagues of the power of digital techniques in delivering cosmetic implant dentistry.
