Implant Year Course 2017

Take the next STEP into dental implants with a difference...

- Marketing
- Mentoring
- Team Work
- Clinical Skills
- Treatment Planning
- Managing Complications
Learn how to place and integrate dental implants into your practice with STEPeducation and BioHorizons.

The aim of this Implant Year Course is not only to clinically train the dentists in implantology, but also to educate their practice team on how to support the dentist and integrate implants as a treatment option into the practice.

So, unlike many implant year courses, this course is intended for the dental team and aims to ensure the practice will be fully prepared for when implants do become a treatment option.

This course is limited to 20 dentists and their associated dental teams:

- Dentist
- Practice Manager
- Treatment Coordinator
- Nurse
- Hygienist
- Receptionist

Each delegate will be linked to a regional mentor for support and guidance throughout the course.
Anthony Summerwill
BDS FDS (Rest Dent) MRD RCSEd
Mr Anthony Summerwill was a consultant in Restorative Dentistry at Birmingham Dental Hospital for 14 years. In 2014 he left the hospital service to focus on specialist practice and dental education. He is a specialist in Restorative Dentistry, Prosthodontics and Periodontology and a founding partner of the Westbourne Centre. He has a wealth of experience in education and lecturing, both within the UK and internationally. He is an ITI fellow and a board member of the International Academy of Oral and Facial Rehabilitation.

James Hamill
BDS MFDS RCSEd Dip Imp Dent RCSEd
James is the Clinical Director of Blueapple Dental & Implant Team. He has a broad experience in the provision of implant dentistry, in both the surgical and restorative aspects. James is a passionate educator with particular interest in the importance of the dental team and the business of dentistry. He has established the popular Blueapple Study Club for fellow clinicians, and is a regular speaker in the UK & Ireland for the ITI. In 2010 James was delighted to receive the title of a Fellow of the ITI, for his education role in this organisation.

Robert Oretti
BDS, MGDSRCS, MFDSRCS, MFDSRCPS
Robert qualified in 1987 and after working in an orthodontic practice for 4 years came to Newbury in 1992. In 2002 Robert was invited to become tutor/mentor for a corporate dental group and was involved at its inception in the establishment of the implant protocols and mentoring programmes still currently used today. Robert is currently a post graduate tutor for the Oxford and Berkshire deaneries, a mentor and faculty educator for the ADI, a mentor and international speaker for the ITI, a Royal College of Surgeons examiner for the implant diploma (RCS Edin), as well as scientific director of BAAD.
Tutors

**Paul Swanson**
BDS MFGDP UK Dip Imp Dent RCSEng MSc (Implant)

Paul Swanson qualified from the University of Liverpool in 2000. In 2008 he received the Diploma in Implant Dentistry from the Royal College of Surgeons of England and the Advanced Certificate in Bone Grafting. In 2011 he received a Master of Science degree in Implant Dentistry from Queen Mary University of London. Dr. Swanson owns a specialist referral practice in Liverpool and contributes to the multidisciplinary cases done by his team. He mentors dentists at both entry level and advanced implantology and contributes to study clubs in his region. Paul is the co-director of IDEAL – an organization running dental courses for all members of the dental team.

**Nigel Kirk**
BDS (Birmingham) MJDF RCS (Eng) MSc Restorative Dentistry MSc Dental Implantology L.D.S. R.C.S (Edin 1985) MSc (UCL 2004)

Dr Nigel Kirk qualified from Birmingham Dental School in 1999 and has a Masters degree in Restorative and Cosmetic Dentistry. He also has a Masters Degree in Dental Implantology. He holds his Joint Membership Exams for both the Royal College of Surgeons and the Faculty of General Dental Practitioners. He is a Core Examiner for the Royal College of Surgeons and is on the national committee for the Association of Dental Implantology.

**Mark Emms**

Mark Emms qualified from Edinburgh’s Royal College of Surgeons in 1985 and bought The Priors Dental Practice in 1986. Mark has undertaken several years of prosthodontic training and has been placing dental implants successfully since 1992. With his Masters degree (2004) in Conservative Dentistry, from the Eastman Dental Institute, University of London, Mark has demonstrated a skill and talent for this particular area of dentistry. Mark’s core ethos is on high quality dentistry with longevity, ensuring the best results for his patients for many years to come.
Ideally delegates should have a minimum of 2 – 3 years post graduate experience with evidence of basic oral surgery skills.

For delegates with limited oral surgery experience, Step Education will provide a one day ‘Introduction to Surgical Dentistry’ course.

The hands on Introduction to Surgical Dentistry course will cover all aspects of basic oral surgery including:

- Introduction of technique, instrumentation and materials
- Flap design (pigs head)
- Soft and hard tissue management
- Suturing
- Post operative care and complications
- Local anaesthesia and analgesia

For delegates who wish to offer only the restorative aspects of implant dentistry, the mentorship programme will be tailored accordingly with the recommendation that they attend for all surgical phases and observe / assist their mentor.
Structure

COURSE STRUCTURE

This course will consist of 10 modules over a period of 10 months.

The course will start in March 2017 and will run through to November 2017.

Days 1, 2 and 10 will be devoted to the dental team.

Under the guidance of a mentor, each delegate will be expected to complete 3 documented cases to include:

- a premolar / molar unit
- an overdenture case
- a small multi-unit case

Delegates will be issued with a log book to record each case along with forms to assess risk, collate treatment plans, collate patient consent and also provide a structured treatment planning template.

All delegates including associated dental team members will be required to maintain a journal of their implant journey and to present their experiences on day 10 of the course.

COURSE FEE

- Implant year course:
  
  Dentist fee: £6500 (+VAT)
  
  Associated Dental Team fee: £75 (+VAT) per member per day of the course
- One day Introduction / Refresher to Surgical Dentistry course: £350 (+ VAT)

Any delegate who feels they would like a refresher on basic surgical skills should contact Step Education and a one day course can be arranged (dependant on numbers of delegates). This would be at an extra cost of £350 per delegate.
Module 1

Getting your practice and team ready for implant treatment
What are dental implants?
What can implants do for you, your patients and your practice?
Where do implants fit into patient care?
What are your roles within the implant team?
The financial aspects of implant treatment
Dental implants and ethics
Patient types and how to deal with them
The importance of communication
Guidelines and standards
Developing a 10 step plan for getting implants into your practice
Module 2

WHEN
3rd March 2017

LOCATION
Birmingham

DELEGATES
- Dentist
- Practice Manager
- Treatment Coordinator
- Nurse
- Hygienist
- Receptionist

TEAM DAY

Dentist
- Treatment options for tooth replacement
- Risk factors and evidence base
- An overview of medical, dental and social factors
- Case selection
- Risk assessment and case selection
- Record keeping and data collection with course templates
- Radiography and dental implants
- Costing implant treatment and communication
- Grading complexity
- Treatment planning templates

Nurse
- Preparing the surgery
- Principles of cross infection and instrument sterilisation
- Implant kit familiarisation
- Instrument identification and their use
- Aseptic technique and set-up
- Placing an implant
- Suture types and use
- Post-operative care for your patient
- Patient communication and dealing with problems
- The prosthetic interface
- Restoring dental implants – hands on restoration

LOCATION

Birmingham

DELEGATES
- Dentist
- Practice Manager
- Treatment Coordinator
- Nurse
- Hygienist
- Receptionist

TEAM DAY
Module 2

WHEN
3rd March 2017

LOCATION
Birmingham

DELEGATES
• Dentist
• Practice Manager
• Treatment Coordinator
• Nurse
• Hygienist
• Receptionist

TEAM DAY

Treatment Coordinator, Practice Manager, Hygienist and Receptionist

• The language of implants
• Telephony
• Marketing your service
• Communication
• Implant workflow and planning
• Placing an order
• Data capture and patient satisfaction / audit
• Clinical staff support
• Financial aspects of implant treatment
• Dealing with complaints
• The practice journey
Module 3

TREATMENT PLANNING AND SITE PREPARATION

Dentist

- Case update – what cases have we found?
- Stabilisation
- Temporisation of the edentulous site
- Extraction techniques
- Implant site preparation to include ridge preservation protocols
- Use of assessment templates
- Diagnostic procedures and fabrication of surgical templates
- Mentor assignment

WHEN
6th April 2017

LOCATION
Birmingham

DELEGATES
- Dentist
Module 4

WHEN
7th April 2017

LOCATION
Birmingham

DELEGATES
• Dentist

IMPLANT SURGERY

Dentist

• Case demonstrations showing planning, risk assessment and surgical delivery
• Kit familiarisation
• Surgical instruments and materials
• The biological basis of implant treatment
• Anatomy relevant to implant surgery
• Pharmacology – to include local anaesthesia, antimicrobials, analgesia and anti-inflammatory drugs
• A review of basic surgery
• Hands on implant placement
• Post operative healing and the complications
• Healing abutment selection
Module 5

WHEN
11th May 2017

LOCATION
Birmingham

DELEGATES
- Dentist

IMPLANT PROSTHODONTICS

Dentist

- Case update – where are we now?
- The language of implant prosthodontics
- The prosthetics kit
- Prosthetic design – function and form
- Impression techniques
- Occlusion and jaw registration
- Abutments – types and selection
- Cement v screw retention
- The soft tissue interface
- Platform switching
- Clinical aspects of implant prosthodontics – video case log
- Hands on using torque-tite models
Module 6

WHEN
12th May 2017

LOCATION
Birmingham

DElegates
• Dentist

MULTI UNIT CASES

Dentist

• Options to rehabilitate the edentulous jaw
• The sequelae of edentulism
• Quality of life and dental implants in the edentulous patient
• Overdenture design and terminology
• Case presentation and hands on Locator exercise
• Multi-unit prosthetic management
• Use of cantilevers in implant treatment
• Passive fit and verification
• Risk assessment and management of risk in the more complex case
• Occlusal considerations in Multi-unit treatment
• Treatment planning Multi-unit work – hands on practical exercise
• Complications and costs with Multi-unit restorations
Module 7

WHEN
16th June 2017

LOCATION
Birmingham

DELEGATES
• Dentist

THE AESTHETIC ZONE

Dentist

• Case update
• Advanced planning in the aesthetic zone
• Risk factors in aesthetic management
• Advanced radiography – CT planning
• Reinforcement of three dimensional implant placement and surgical considerations / contour augmentation
• Soft tissue sculpting with provisional restorations
• Customised impression pick up - hands on practical
• Team work – communication with the technician and technical processes
• Review and case series presentations
## Module 8

**WHEN**
5th October 2017

**LOCATION**
Dependant on delegate location - various centres are available around the UK

**DELEGATES**
- Dentist

### LIVE SURGERY

**Dentist**

- Case update - where are we now?
- Live surgery / restorative management
- Live surgery demonstrations through regional mentors practice
Module 9

WHEN
6th October 2017

LOCATION
Dependant on delegate location - various centres are available around the UK

DELEGATES
• Dentist

MANAGING COMPLICATIONS

Dentist

• Technical and biological failures
• Managing patient / dentist issues
• Maintenance requirements
• Peri-implant issues and dealing with peri-implantitis
• Removing the failing implant
• Dealing with soft tissue deficiencies
Module 10

Testimonials

I found the course informative and extremely useful. Anthony Summerwill and James Hamill inspired confidence and have supported us throughout the course. I found the mentoring system extremely helpful. I would recommend this course to anyone wishing to start placing implants or to improve upon their implant skills.

Laura McMahon

I found the course to be very relevant to my clinical practice with lots of tips from your experience which you shared with the group. These will enable me to do more predictable prosthetic work in the future and with less complications. For this I am very grateful.

Paul Kidman

I would thoroughly recommend the Step Education implant course. Anthony and James provide a very professional yet relaxed environment for learning. There is plenty of access to the practical aspects as well as providing the link up with a local mentor to carry out cases in your own practice under supervision. The course gave me the confidence and knowledge to start placing and restoring implants for my own patients. On a purely business basis the course is a sound investment having paid for itself during the first year.

Martin Rice
Step into an Implant Year Course that offers you:

- Implant training modules for the whole Dental Team
- Live Surgical Skills
- The opportunity to select and treat your own patients
- Local mentors with fixed fee structures
- Training for single unit, overdenture and small multi-unit cases
- Implant case log book and journal to record everyone's experiences to help share best practice
- Risk assessment, patient consent, structured treatment planning forms
- Access to 'Introduction to Surgical Dentistry' Course*
- GDC compliant curriculum
- BioHorizons Territory Manager support
- Advice to build your Practice Business
- Comprehensive teaching modules and support tools designed to get you and your practice implant ready

* This is a pre-requisite to the year course. Charges apply see page detailing Structure
