Vestibular Fresh Extraction Socket Therapy

Dr. Abdelsalam Elaskary

A unique course describes a novel clinical protocol to treat a wide variety of fresh extraction sites (thin, or deficient labial plate of bone, severely compromised, actively infected) with immediate implant placement. The protocol is designed to repair socket osseous environment and place an immediate implant at the same surgical setting thus providing immediacy and predictable outcomes. The VST protocol offers shortened treatment time, reduces the number of surgical interventions to only one, preserves the original socket orifice topography during the steps of the treatment until completion, and allows the complete socket rehabilitation with immediate implant placement and bone regeneration.

Dr. Abdelsalam Elaskary is the founder and inventor of the vestibular socket therapy protocol, as well as the founder of the Elaskary & Associates clinic & educational institute located in Alexandria, Egypt. He is currently a visiting lecturer at the University of New York, NYU, and the president of the Arab society of oral reconstruction, "Reconstructive Aesthetic Implant Surgery" & "Fundamentals of Aesthetic Implant Dentistry" and "Advances in Esthetic Implant Dentistry"; all published by John Wiley and translated in several languages. Dr. Elaskary has published numerous articles in journals as well as an active member of the editorial review board of the *International Journal of Oral Implantology*.

agenda

day 1

9:00-9:30am	Refreshments and coffee, acquaintance
9:30am-12:00pm	Fresh extraction sockets: biology, physiology, & management of various socket conditions
12:00-1:00pm	Lunch break
1:00-2:00pm	Management of class 1 & 2 fresh extraction sockets
2:00-3:00pm	Managing infected sockets & multiple adjacent fresh extraction sites
3:00-3:30pm	Coffee break
3:00-4:30pm	Managing complications

day 2

9:00-11:00am	Workshop on plastic models
11:00am-12:00pm	Coffee break
12:00pm	Live patient surgery demo & discussion

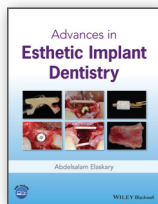

date

9-10 December 2021

tuition

2,995 EU

Inclusive: 3 nights lodging accommodations and airport transfers. The program includes lectures, hands-on, and a live surgery performed by the instructor.

A copy of Dr. Elaskary's latest textbook *Advances in Esthetic Implant Dentistry* *will be offered* to each participant.
